INTRODUCTION

This sixth edition of the Wyoming Data Handbook is designed to be a handy reference book of demographic, economic, and physical data concerning the State. The purpose of the Handbook is the compilation and dissemination of this pertinent data. For the most part, this edition updates data presented in the 1981 Handbook. This updating will provide an accurate historical series of statistics. Through the on-going editing process, information which is no longer timely or relevant has been eliminated, while new or supporting information has been added. Response to previous editions of the Handbook and inquiries concerning the new edition have been great. The Division of Research and Statistics hopes this 1983 version will prove to be as popular and useful as past editions. As always the Division welcomes comments and criticism.

The data has been compiled from various State and federal agency publications, unpublished files and other sources. Some new Census data will not be available until the 1985 handbook is released. In most cases the source is referenced immediately following the respective table unless a series of tables have the identical sources. If this occurs the reference for the tables is given following the last table in the sequence. The county summary sheets are an exception because of the number of different sources utilized. If additional information on a particular subject in the summary sheet or other sections is needed, the interested reader can contact the originating agency or this division directly. Additional copies of the 1983 Wyoming Data Handbook may be obtained from the Department of Administration and Fiscal Control, Research and Statistics Division, Room 302 Emerson Building, Cheyenne, Wyoming 82002.

STATE INFORMATION

DEMOGRAPHY

The demography section contains information on the characteristics of Wyoming's people. Most tables provide the statistics by counties as well as State totals and averages. This edition relies heavily on the use of 1980 Census data because of the timeliness of this information. Except for census years, the figures on population are estimates provided by the agency referenced at the end of the table. Employment and income data are also estimates. The vital statistics are the result of enumeration of local records. All figures are reported in calendar years.

BUSINESS AND INDUSTRY

The Business and Industry section begins by presenting various economic statistics that provide a look at the general economic condition of the State. The section is then divided into eight categories on the basis of the Standard Industrial Classification Code. In each section estimates for employment and income are presented for the last eight calendar years. Other statistics are presented if they contribute to the understanding of the present economic state of the particular sector. All values are reported for the calendar year except where noted.

WYOMING COST OF LIVING INDEX
(WCLI)

The WCLI annual inflation rates presented are based on changes in the prices of 139 items in the largest city in each county of Wyoming. Each price is compared to the price of that same item in the corresponding quarter of a year ago. The WCLI uses a similar weighting system to that used by the National Consumer Price Index (CPI) and adjusts all prices depending on population in each town and region. In the second quarter 1983 a change was made to a rental equivalency approach for home ownership to more closely resemble changes made by the CPI.

1/ The incidence rates represent the number of injuries and illnesses, or lost workdays per 100 full-time workers, and were calculated as: (N/EH) X 200,000, where
N = number of injuries and illnesses, or lost workdays
EH = total hours worked by all employees during calendar year
200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

2/ Includes fatalities. Because of rounding, the difference between the total and the sum of the rates for lost workday cases and nonfatal cases without lost workdays may not reflect the fatality rate.

3/ Includes state and local government and excludes farms with fewer than 11 employees.

4/ Excludes farms with fewer than 11 employees.

Reflecting a sluggish economy, the number of new Wyoming corporations in FY 1983 is down by 11.43% from FY 1982.

The top five counties by number of new corporations are:

#1 - Natrona
#2 - Laramie
#3 - Fremont
#4 - Campbell
#5 - Teton

In FY 1983 Fremont County moved from the #4 position to #3, dropping Campbell County to #4 in the state.

ESTIMATED ORIGINAL IDENTIFIED COAL RESOURCES IN WYOMING

BY MAJOR COAL-BEARING AREA AND RANK

(millions of short tons)

COAL-BEARING AREA	BITUMINOUS	SUBBITUMINOUS	TOTAL
Powder River Coal Basin		110,218.95	110,218.95
Green River Coal Region	9,904.84	7,207.29	17,112.13
Hams Fork Coal Region	3,197.68	1,676.86	4,874.54
Hanna Coal Field	2,167.14	1,749.82	3,916.96
Wind River Coal Basin		1,025.79	1,025.79
Bighorn Coal Basin	17.90	563.78	581.68
Rock Creek Coal Field		305.18	305.18
Jackson Hole Coal Field		121.49	121.49
Black Hills Coal Region	41.09		41.09
TOTAL	15,328.65	122,869.16	138,197.81[1]

[1] The identified resources only include mapped and explored coals between 0 - 3,000 feet of cover. When an estimate of undiscovered and hypothetical resources between 0 - 6,000 feet of cover is added, the State's original resources increase to approximately one trillion tons.

NOTE: There has never been an estimate of the coal resources of the Goshen Hole Coal Field

TRANSPORTATION COMMUNICATIONS AND PUBLIC UTILITIES

The income and employment estimates presented in this Section combine the Transportation, Communications, and Public Utilities industries. Separate statistics are also included for each industry. The Transportation Section includes data on vehicle registrations, accident statistics, traffic flow patterns, railroad lines, and bus service routes. Included in the Communications Section is Wyoming newspapers, radio and television stations in the State and telephone and telegraph companies servicing Wyoming. Data included under Public Utilities includes the location and capacity of electric generating plants in the State, rural electric cooperatives and associations, and public and privately owned public utilities in Wyoming. The source of the information is given after each table or entry.

GOVERNMENT

This section covers both State and local governments. Revenue, expenditure and bonded indebtedness facts have been included to measure the fiscal health of the various governmental units. Employment statistics are presented for all jurisdictions. A separate table on employment in the executive branch of State government covers full time employees working during a particular month of the year cited. The section also includes information on selected public services such as education, social services and medical care. In the case of higher education, enrollment figures are reported for both the University and Community Colleges.
